hello,

I'm having some trouble filling contours on maps. I'm using a simple standard cylindrical projection, making an elevation/bathymetry map. If I go beyond certain regions, the colors get all messed up...

I suspect the problem is related to the limitation of filling contours or polygons over maps that cover more than a hemisphere, but, it seems like there should be a work around (I hope... ???).

Thanks for the help. Please respond via email also to mikeh@pmel.noaa.gov.

Mike
