Subject: Masking of land/sea

Dear all of you,

I hope this is a simple question:

I am using IDL 5.1 for IRIX at an O2.

I have an irregular grid of land-based observations, which I want to
plot on a map using CONTOUR,/irregular,/cell_fill. I will show map and
grid using (MAP_SET), MAP_CONTINENTS, and MAP_GRID. Is there a way to
avoid contour colors over sea, where they do not have a physical
meaning? Something reciprocal to MAP_CONTINENTS,/fill_continents , may
be?

Thanks in advance! /Ole
