
Subject: SAVE file size limit?

We get the following error when trying to restore a SAVE file:

```
% RESTORE: Truncated save file, restored as much as possible:
fm1b3-7alld500m.sav.
```

Is there a size limit on SAVE files? I notice that two files, both "Truncated", have the same file size:

```
fireman@barebackride> ls -l /data10/l1A_data/khayat/
total 140032
-rw-r--r--  1 khayat  user   35848192 Dec 11 13:47 fm1b1-2alld250m.sav
-rw-r--r--  1 khayat  user   35848192 Dec 11 13:50 fm1b3-7alld500m.sav
```
