Subject: IDL Development Environment 5.0
Posted by   on Wed, 16 Dec 1998 08:00:00 GMT

Hi!

I'm using IDL 5.0 for two days now, and have a troublesome problem. In
the new development environment the command log does not scroll
automatically when its output has reached the bottom. So I have to use
the scrollbar whenever there comes new output in the command log.

Can anyone tell me how to switch off this behaviour of my command log? I
didn't find any cue in the preferences :-(

Thanks
Hans Joerg
