Job Title: Programmer/Software Engineer - C++/Java/IDL- Medical Image Display

C++/Java and/or RSI IDL programmers and engineers are wanted to develop and maintain multi-platform medical image display applications for clinical research use.

Required experience includes 3-4 years of GUI programming and image display experience using C++ or IDL on Windows, Mac OS and X Windows. Java experience and familiarity with medical image formats and protocols including DICOM are desirable. Formal training in and experience with software engineering methodology and quality software regulations are preferred.

Quintiles Intelligent Imaging is a contract research company providing international clinical research services for pharmaceutical and medical device manufacturers, located in the northern suburbs of Philadelphia PA, offering competitive salaries, flexible benefits and telecommuting opportunities.

Qualified candidates should send resume by fax to 610-238-0578 or email to "mailto:jceccoli@i2image.com". Quintiles is an Equal Opportunity Employer M/F/D/V.
