You can load as many colors as you need, or you can load any
one of the 41 color tables that comes with IDL. If you load
color tables (XLOADCT or LOADCT, for example), you may want
to know what color is associated with which index. The program
CINDEX from my anonymous ftp site is useful for this purpose:

   ftp://ftp.dfanning.com/pub/dfanning/outgoing/misc/cindex.pro

Cheers,

David
