You have to add the ALL_EVENTS keyword to your example:

```
pro test_event, event
  help, event, /Structure
end
pro test
  w=widget_base( /COLUMN, /KBRD_FOCUS_EVENTS)
  item1 = widget_text(w, value='1', /EDITABLE, /ALL_EVENTS)
  item2 = widget_text(w, value='2', /EDITABLE, /ALL_EVENTS)
  widget_control, /REALIZE, w
  xmanager, 'test', w, /JUST_REG
end
```

Cheers,

David
