Hi Folks,

Does anyone have a good program to add wind vectors to maps?

I get asked about this a couple of times a week, it seems.

I hacked up VELOVECT (or was it VEL?) some time ago to sort of do the job, but I wondered if someone had something more elegant they would be willing to share. I would post it on my web page for all to use.

People will thank you by showering you with cold, hard cash.

Oh...sorry...I dozed off. I think I was dreaming... :-)

Cheers,

David
