I have a little ShowProgress function on my anonymous
FTP site that illustrates a "show progress" indicator of
the type you are trying to build. You can find the program
at this URL:

`ftp://ftp.dfanning.com/pub/dfanning/outgoing/misc/showprogre ss.pro`

Compile the file. Then type "Test" to see it work. You
can interrupt the loop with the CANCEL button. Look at the
TEST_EVENT event handler to see how the ShowProgress
program is suppose to work.

Cheers,

David
