Hi,

I want to change the default backgroug color of WIDGET_DROPLIST under
unix.

I try to change the resource XmPushButton*foreground of Idl to have a
red backgroud like this:

```
Idl*XmPushButton*foreground: #FF0000
```

It works for the list of buttons, but not for the main button. How can I
change the default background color of the main button of a
WIDGET_DROPLIST?

thanks to help me.

Jean-Yves
