Subject: How write multi-D tiled data to file?

---

Using the ENVI tiling procedures I produce 3-dimensional tile arrays  
that I want to write one after another to a 3-band file.

When I use WRITEU the 3rd dimension of the tile is not taken into  
account and the layers are concatenated into a 2D array

Is there a way to properly concatenate 3D array tiles to obtain a 3-band  
file ?
