Subject: GetColor Program

Posted by davidf on Wed, 10 Mar 1999 08:00:00 GMT

Hi Folks,

Martin Schultz wouldn't let me rest until I had added the
ability to get the color names back from my GetColor program.
He wanted them so he could add the color names to a list
widget easily. In the interest in getting back to work on
my book, I decided to make the change and (hopefully) stem
the flood of e-mails from Martin. (Doesn't he have anything
to do? How come he isn't working on that structure editor?) :-)

So here is the new version:

  http://www.dfanning.com/programs/getcolor.pro

If you want the names, use the NAMES keyword:

```
IDL> names = GetColor(/Names)
IDL> Print, names
```

Now. Back to work....

Cheers,

David
