Subject: block if
Posted by Mason P on Tue, 16 Mar 1999 08:00:00 GMT

Does anyone know if there is something inherently wrong with unix
PV-wave
version (6.01) with respect to 'block if constructs'. Each time I type
in:

IF I=0,N DO BEGIN
    ....
ENDFOR

(as prescribed by the manual) it gives a 'syntax error' with regards the

'endfor' statement. Is it just a bug or am I just stupid ?#.
