Dear all,

I am using the DROPLIST keyword in the porcedure CW_FORM.
I initialize a value (e.g. 4) of the list with the SET_VALUE keyword.
I create the widget using CW_FORM, I do what it ask me but I
don't change the dropdown (so I keep the initial value).
The problem is that the tag returned for the DROPLIST is
0 (and not 4).

If anyone can help me,

Quentin.
