Hi Folks,

I've been meaning to do this for some time now, but this weekend I finally got around to writing up a couple of tips concerning filled contour plots. The essential tip is this: don't allow IDL to choose the contour intervals for you by using the NLEVELS keyword if you want your filled contours to look right. Instead, choose your own contour intervals and apply them with the LEVELS keyword.

You can find the details here:

<http://www.dfanning.com/documents/tips.html#NewTips>

Cheers,

David
