Dave, do you set viewplane rectangle to [0, 0, 1, 1]? Do you then explicitly specify the location for your axis in a view? Default settings ([-1, -1, 2, ,2]) do not seem to make sense., axes start in the center of the screen then. Well, too many questions I'm afraid. Could you tell me, is there a procedure in your archive that does it, which I could examine to see how you did it?

Thank you, Pavel
