I've problem with my operating system Linux. When I digit at prompt

"insight" there is this message:

% Restored file: INSIGHT.

% Unsupported X Windows visual (class: StaticGray, depth: 0).

  Substituting default (class: <UndefinedVisual>, Depth: 0).

% Execution halted at: INSIGHT

%               \$MAIN\$

On my portable machine I've Linux SuSe 6.0

How can I resolve this problem?

Thanks

Raffaele
