I've problem with my operating system Linux. When I digit at prompt

"insight" there is this message:

```
% Restored file: INSIGHT.
```

```
% Unsupported X Windows visual (class: StaticGray, depth: 0).
```

```
  Substituting default (class: <UndefinedVisual>, Depth: 0).
```

```
% Execution halted at: INSIGHT
```

```
%                $MAIN$
```

On my portable machine I've Linux SuSe 6.0

How can I resolve this problem?

Thanks

Raffaele
