Hi David (and others),

I feel ashamed. I should probably tell everyone to delete their version of EXPLORE and start right away coding it properly. (if I only had time for this). I must say that I started to write EXPLORE when I still considered myself an IDL novice (they didn't have insight (pun;-) back then), and David was probably still dreaming about his book. So, in short: it's bad code but it works to my satisfaction. Maybe I should distribute it as sav files only ....

Martin.
