Hi all -

The recent IDL vs. PV-WAVE comment gave me an idea. As some of you might remember, I used to maintain the PV-WAVE FAQ several years ago. It was only released a couple times before I ended up changing jobs and haven't used PV-WAVE since. If someone wants to bring the FAQ up to date, I'll put it into a database similar to the current IDL FAQ. That way anyone can update it as needed, and it doesn't require any real management by one person. The last release is at

<http://www.ivsoftware.com/pvwave_faq.html>, and is dated May 4, 1995. For those that are into PV-WAVE and haven't checked the IDL FAQ, you can see how the database version of the IDL FAQ works at <<http://www.ivsoftware.com:8000/FAQ/>>.
