Subject: Re: TVRD'ing under windows Posted by Pavel Romashkin on Thu, 06 May 1999 07:00:00 GMT View Forum Message <> Reply to Message

I remember reading that in order to tvrd/ tv you should have IDL provide the backing store (device, retain=2). Maybe the Windows backing store is not communicating with IDL properly in 16-bit mode. I have not tried it myself, just remembered reading about it. Cheers,

Pavel
