
Subject: Retrieve content of Droplist

Although it may be trivial, I cannot manage to retrieve the currently selected value of a droplist (the online help of IDL is somehow a bad joke...). It is defined as follows:

```
WID_DROPLIST_RULEWT = Widget_Droplist(WID_BASE_0, $
  UNAME='WID_DROPLIST_RULEWT' ,XOFFSET=4 ,YOFFSET=45 $
  ,SCR_XSIZE=135 ,SCR_YSIZE=23 ,TITLE='Fusion rule' ,VALUE=[ $
  'average', 'waverage', 'maximum', 'minimum', 'himaximum', $
  'hifirst', 'hisecond', 'hi/lo', 'lo/hi' ])
```

Can anyone help? Thanks!

Thomas
