Hallo Raffaele,

maybe I can help you. I received the same error messages several weeks before. I fixed it by switching the X-Windows to 32 bpp.

You can do this using the SaX program in SuSE 6.0 (Yast -> X Windows Configuration -> SaX -> graphics card). I am using also SuSE 6.0, my graphics card is a 16 MB one.

Hope this helps.

Ciao, Harald
