XPLOT is a rather nice IDL plotting application I just ran across. Check out

<http://www.esrf.fr/computing/expg/subgroups/theory/idl/xplot/xplot.html>

It passed my quick reliability test: it did not crash in the first 5 minutes. The source code is available at
<ftp://ftp.esrf.fr/pub/expg/idl/idlexpg.tar.Z>

It worked fine for me under IDL 5.1

Cheers,
Liam.
