Subject: SVD in WAVE broken???
Posted by patel on Fri, 10 Dec 1993 15:42:52 GMT

Hello:

Yesterday I was talking to a friend of mine who has both WAVE and IDL running on his machine. He claims that the SVD routine in WAVE runs considerably slower than the SVD routine in IDL. He also told me that for matrices of size 50000 X 20 the wave routine came back with error message saying no space or something like that where as the IDL gets him the results!! It was a surprise to me since I thought the core routines in IDL and WAVE are the same. Anybody care to comment on this?
