<HTML>

Hi all,

<BR>I'm using the david fanning's "xwindow" procedure.

<BR>I used it with the keyword "wid" to make other oeparations

<BR>on the display window.

<BR>I need to have the PS&nbsp;output of currently display and not

<BR>of the starting display.

<P>Has anyone just modified the procedure to do that?

<P>Thank you.
