
Subject: oplot in normal coordinates?

Hello

Just another problem with plotting: is it possible to oplot in normal coordinates?

```
plot, [0],[0],xrange=[-1,1],yrange=[-1,1]  
oplot,[0.5],[0.5],psym=2,/normal
```

plots the symbol at (0.5,0.5) in data coordinates instead of somewhere around (0,0), which would be the appropriate place in normal coordinates. Am I overlooking something?

(btw.: PV-Wave 6.1, Solaris 2.6)

Cheers

Martin
