## Subject: USA Map Generation Posted by Ann\_Mazuk on Mon, 10 Jan 1994 22:53:43 GMT View Forum Message <> Reply to Message

I am curious if any of you have used the mapping routines in IDL. More specifically, has anyone tackled the challenge of drawing a USA map and then doing some sort of polyfill to color in each state with a different color?

IDL seems to draw state borders in \*many\* segments; first the most complex borders and finishes up with simple (linear) borders. I have no problems drawing the baseline map using MAP\_SET, just more curious about the color polyfills of the states. Is this an uphill battle?

Thanks.

Ann
