<BR>> Dear Liam,the startup file seems to be executed after the check on
the license,
<BR>> and I need to shadow the 'do you want to wait for...... (y/n)?' message
<BR>> to the user and exit automatically.

<P>You are absolutely correct. As far as I can tell after 20 minutes of
<BR>experimentation, there is no way to do this inside IDL.</BLOCKQUOTE>

<BLOCKQUOTE TYPE=CITE>(2) Check the FlexLM documentation at
<BR><A
HREF="http://www.globetrotter.com/lmsupp.htm">http://www.globetrotter.com/lmsupp.htm</A>.
I looked at lmstat, but I
<BR>couldn't see how to check if all licenses were in use.</BLOCKQUOTE>
I think it's possible to use a shellscriptto execute the lmstat redirecting
the output and to search  for the string
<BR>giving license available information and to do the appropriate action
(run IDL or exit).
<BR>But I think it's a piggy way.

<P>Have a good day.
<BR>              
        
Nando.
