The following function may help:

```
;---cut here---  
FUNCTION CHECK_DEMO_MODE  
  
;- Check for demo mode consistently in IDL versions 5.0, 5.1, 5.2  
;- Returns TRUE if IDL is running in demo mode.  
  
if float(!version.release) lt 5.1 then begin  
    return, demo_mode()  
endif else begin  
    return, !mgr(/demo)  
endelse  
  
END  
;---cut here---
```

Then all you need in your startup file is

```
if check_demo_mode() then exit
```

Cheers,
Liam.
