Subject: help windows idl Posted by winterdead on Mon, 02 Aug 1999 07:00:00 GMT View Forum Message <> Reply to Message

what the hell does this mean. the file is where its suipposed to be everything is properly define but it keeps saying this when i try to use it. also windows is only reading the filenames on my cd's up to 8 characters why? how can i change?

also when aligning pic's do i have to individualy set variables like a1=('cdrom/data/example')

thanx
