Uh, no. My definition of being famous is to throw
one of Stein Vidar's no-loop constructions up on the
board and say to the class, "Like that, of course!" :-)

Someone pointed out to me the other day that I...
uh, *overused* the phrase "of course" in my book.
They said nothing is "of course" to a beginning IDL
user. So I want you to know that I went through the
whole damn book and eliminated all 5,438 instances
(or whatever it was) of them. I'm calling this the
2nd (Less Pedantic) Edition. :-)

Cheers,

David
