I heard through the grapevine that they ran into a bit of a snafu with one of the nifty new features of the IDLDE. They wanted to get this sorted out before they released the beta. It should be soon now. The feature is worth waiting for, I think. (Can't say more now, because you never know what will or won't show up in a beta until it is actually delivered. Remember, it's not the *final* product.) :-)

Cheers,

David
