<blockquote TYPE=CITE>It's hard to say exactly what the problem is without seeing any code.

However the following two items are crucial:

<p>(1) At startup, before you issue any other commands, type

device, true=24, decomposed=0, retain=2

>window, /free, /pixmap

wdelete, !d.window</blockquote>

<p>
Can you explain why it is important to create then destroy a window?
