Greetings-

Sun SPARC IPC, SunOS 4.1.2, PV-Wave CL v4.1

I am trying to create an HPGL file to run through my plotter. The plotter prints out xfig files just dandy, but will only plot the outline of the graph of PV-Wave output. Do any of you use the `set_plot, "hp"` to output graphics??

We are planning to upgrade to SunOS 4.1.3 and PV-Wave CL 4.2 next month.
