There are a few ways to approach this problem.

(1) You can save the contents of each window to an image file (GIF, JPEG, TIFF etc.) using the SAVEIMAGE procedure:  
<http://cimss.ssec.wisc.edu/~gumley/imagetools.html>

(2) You can use the XWINDOW procedure by David Fanning to display your graphics:  
<http://www.dfanning.com/documents/programs.html#XWINDOW>

(3) You can add graphics print button to the IDL development environment:  
[http://www.rsinc.com/services/output.cfm?tip\\_id=1748](http://www.rsinc.com/services/output.cfm?tip_id=1748)

> or: is it possible to copy curves and images and table in a single  
> window ?

Can you be more specific and give us an example of what you'd like to do?

Cheers,  
Liam.
