Subject: changing cursor, general GUI questions
Posted by stl on Tue, 22 Feb 1994 08:43:10 GMT

Hello,

does anyone know how to change the cursor in IDL to say, a hand, or
anything? (I am running idl 3.5 on a sparc 10, SOlaris 1.0) I need
this (currently) to build a panning/grabbing tool for images.

Also: Has anyone had any success build a GUI for IDL outside of IDL?
Like using some standard GUI tool kit and plopping it on top of IDL just
for the interface? (yes I know about widgets in IDL, its just that I am
looking for less restricting alternatives.)

Thanks in advance,

stephen Strebel
