...

I did the following:

NAME = TAG\_NAMES (EVENT, /STRUCTURE\_NAME)

CASE NAME OF

"WIDGET\_TEXT": BEGIN  
POS = WHERE ( T\_EV EQ EVENT.ID )  
POS = (POS(0) + 1) < (N\_LIST-1L)  
WIDGET\_CONTROL, T\_EV(POS), /INPUT\_FOCUS  
END  
ENDCASE

where T\_EV is a long-array with the events according to the different  
TEXT\_WIDGETS.

Karl
