The newest version of idltags (Version 2.1) is ready. What? So soon?
Well, yes! The last release was case sensitive and had a small problem
with very large libraries. These two bugs have been fixed.

Rather than post the latest version I have made it available for anonymous
ftp from [cses.colorado.edu:/pub/idltags/idltags.tar.Z](ftp://cses.colorado.edu/pub/idltags/idltags.tar.Z). If anyone has a
problem or cannot use ftp send me email and will send you a copy.

Again, I welcome your comments/suggestions. If you have any problems please
contact me at:
