Yes. I chose my current ISP because I felt like I was going deaf with the previous one: every time I read a newsgroup article they were replying to one I hadn't seen. It was like catching every other word of a conversation. It was to the point that I was even grateful for those people who quote every damn word of the previous article. :-)

Cheers,

David

P.S. Now, if I could just find an ISP who would cache my articles for 24-hours before sending them out, so I wouldn't keep embarrassing myself...
