
Subject: Posix Time Functions

I posted this a while ago but didn't hear anything so I thought I'd take one more shot. Does anyone know of / have any POSIX time functions for IDL? That is a function which takes seconds since Jan, 1 1970 and returns a nice date structure (year, month, day, etc..). Such beasts are plentiful in Java, C etc so I figure one should be in IDL also.

Thanks
