Hi all,

I wrote an object widget tool to interactively
configure plot parameters (line style, thickness, etc).
It's easy to use - just set the parameters and pass
them to PLOT via the _EXTRA keyword:

```
config = plotConfig ()  
PLOT, INDGEN (10), _EXTRA = config
```

```
; Or you can just configure and plot in one command  
PLOT, INDGEN (10), _EXTRA = plotConfig ()
```

Here is a picture of it so you can see if it's
worth downloading :-)

<http://cspar.uah.edu/~mallozzir/software/idl/img/plotconfig.jpg>

The code is available at

<http://gammaray.msfc.nasa.gov/~mallozzi/home/software/idl/src/plotconfig.pro>

Regards,

-bob
