Subject: help! help! color table and mac Posted by bertram_b_smith on Mon, 29 Nov 1999 08:00:00 GMT View Forum Message <> Reply to Message

Hi,

I am trying to use IDL Version 5.2.1 (MacOS PowerMac) to produce an image plot with a suited color table. However, whatever I try to load the table, the plot is in grey scale. Insight and live_image are too slow and I have to overplot the contours.

Thanks, B
