Ronn,

I don't have a C source code but Matlab code is freely available and so are plenty of papers about the method. Yesterday I attended a seminar in Denmark and people have used it in conjuction with active contours. IMPRESSIVE, I tell you, and the maths behind it are quite simple!

Contact me by e-mail if you want more details.

Cheers!

ΑL

P.S. Sorry for not replying earlier, but I'm still in Denmark, and I had to use DejaNews to check the group.
