
Subject: Y-axis label and hardware fonts

Hi!

When using hardware fonts, the label on the y-axis of my plots is not rotated 90 degrees as I would like. Short of using xyouts and the orientation keyword, is there a way to have that y-axis label rotated when using hardware fonts?

example:

```
!p.font=0  
plot,indgen(9*41),xtitle='Days in 2000',ytitle='Inflation Rate',/xs
```

; Y-axis label is difficult to read.

Thanks!
