Subject: New WWW page for IDL from RSI
Posted by thompson on Wed, 23 Mar 1994 21:32:55 GMT

In case you haven't noticed it, IDL now has a nice World Wide Web home page at
URL:

   http://sslab.colorado.edu:2222/projects/IDL/idl_ssl_home.htm l

It basically explains what IDL is, gives pricing information, supported
platforms, things like that. It also gives one a connection into the ftp site
for downloading the current version of IDL. In addition, there's a gallery
with a bunch of pretty pictures showing what IDL can do--maybe they could also
add some MPEG animations in the future?

Happy webbing,

Bill Thompson
