Subject: axis labels in SURFACE all wrong Posted by noymer on Tue, 18 Jan 2000 08:00:00 GMT

Dear comp.lang.idl-pvwave,

I am making some surfaces using the SURFACE command and the X axis label is vertical, as if it were the Z axis label, instead of running parallel to the axis. The Y axis label is OK, but it is too close to the axis.

Has anyone encountered this before?

TIA, Andrew
