Is there any way to pass functions as arguments in IDL? I would like to be able to do something like this:

```
function f1, x  
  return, x*x  
end
```

```
pro tf1, func, arg  
  return, func(arg)  
end
```

```
IDL> print, tf1, f1, 4  
16
```

Thanks!
