Subject: CTRL-C, CTRL-V question.
Posted by p3qa3 on Sat, 29 Jan 2000 08:00:00 GMT

Hi all,

I want to copy and paste text from other sources using the windows
clipboard to widget_text field.
Somehow CTRL-C/CTRL-V does not work. I found by accident that I can
simply click with the right mouse button in that widget_text field and a
menu appears that gives options like Cut,Paste,Copy ... and this works.
I love IDL, sometimes ....
Anyway, is there any secret hotkey for the keyboard reserved for this ?
Good luck, and thanks, Frank
