I guess I'm not following you at all. That stuff is text isn't it?

Or, at the very least, is can be *made* into text. Why are you having trouble putting it in a text widget?

```
dimensions = Size(image, /Dimensions)
```

```
newText = 'My Image -- Dimensions: [' + StrTrim(dimensions,2) + ']'
```

```
Widget_Control, textID, Set_Value=newText
```

Cheers,

David
